

SAARA Live results

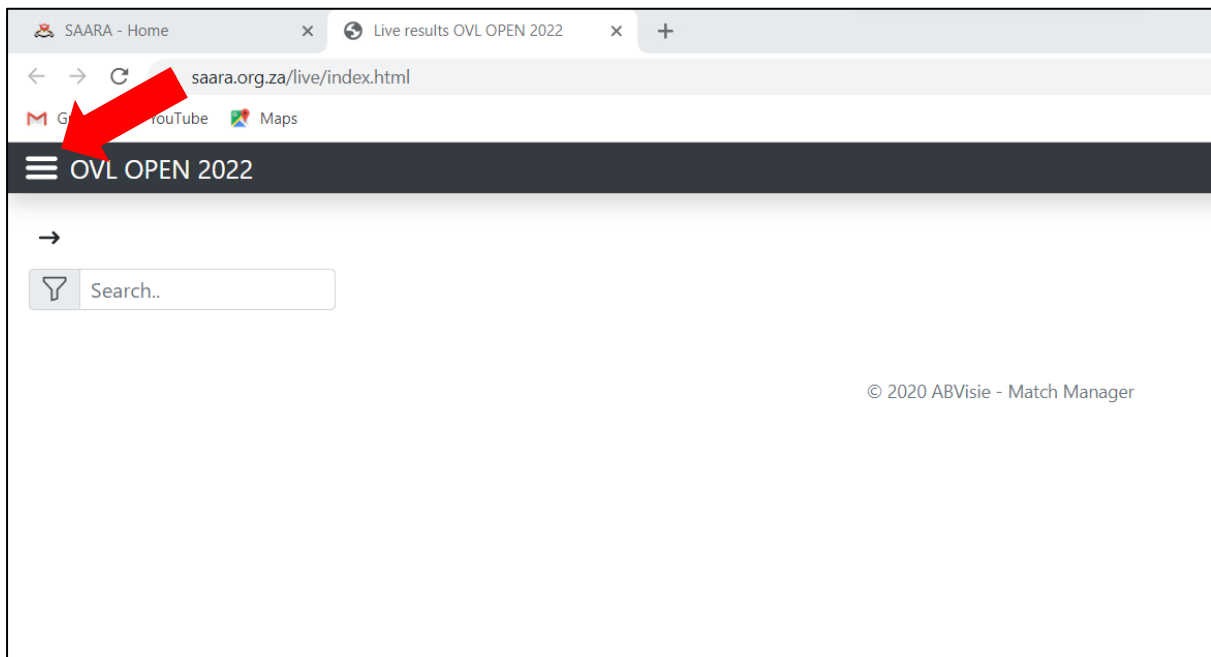

We updated the SAARA paper target scoring software and that means that the app to see your sporter scores on the SAARA website has seen a major facelift.

You can access the sporter results from the SAARA website.

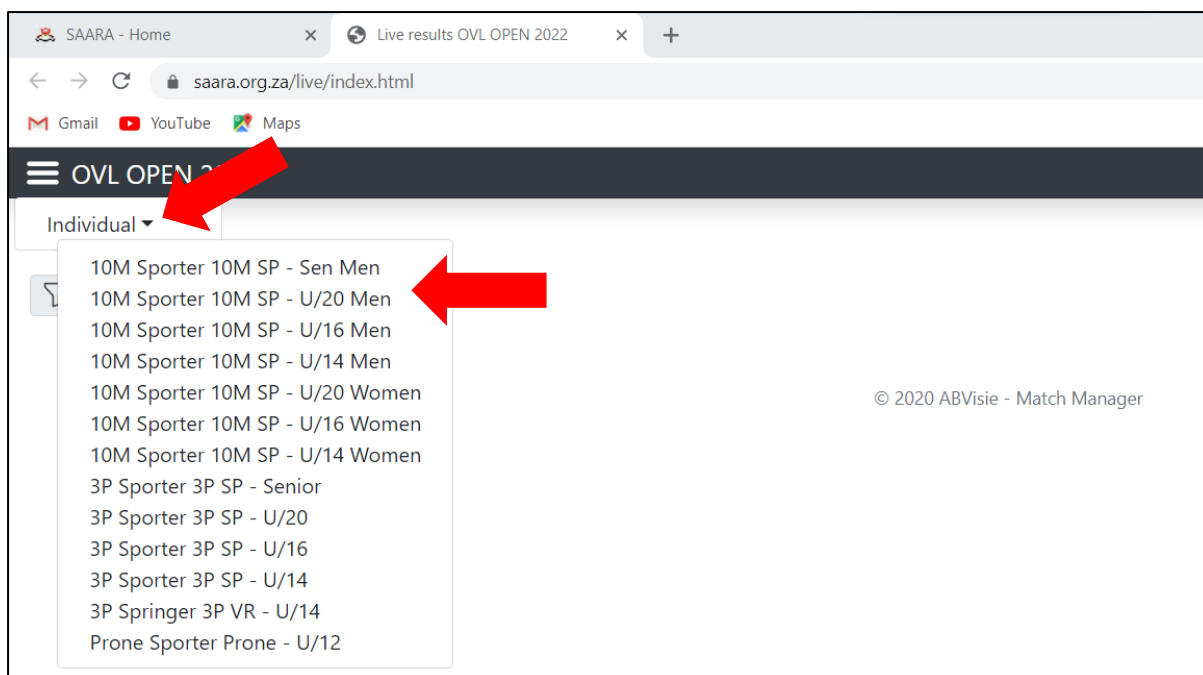

Or follow this link

<http://www.saara.org.za/live/index.html>

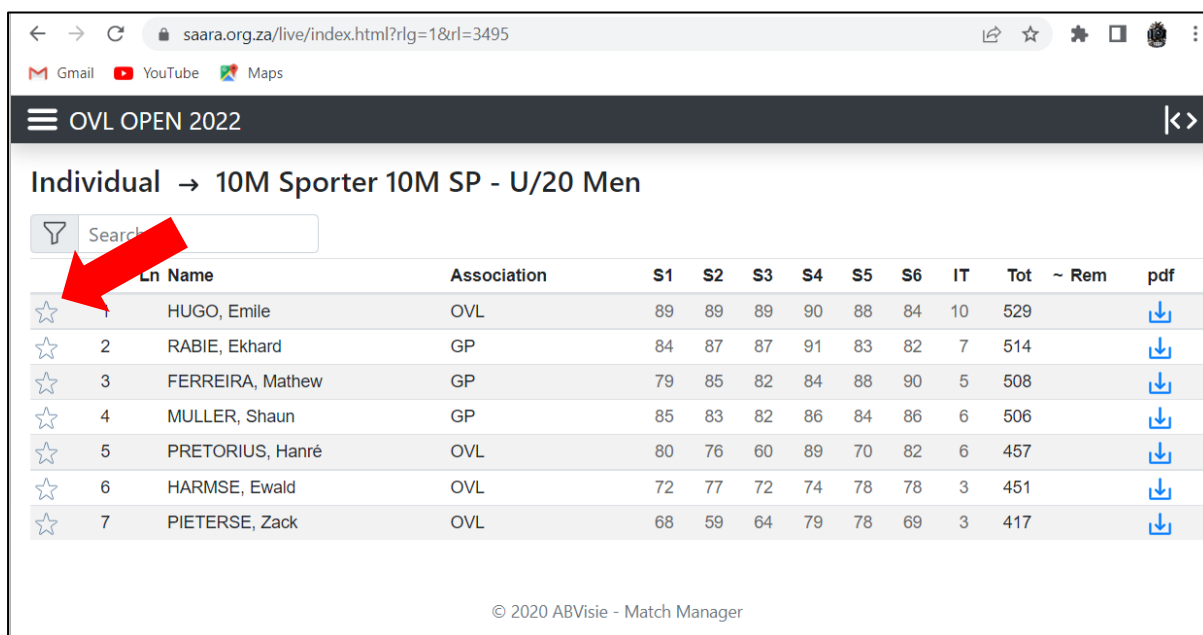

Click on the menu icon to bring up the screen to select the disciplines.

Select *Individual*

You can select from the list of disciplines to see the results for that discipline.

The list of participants will be displayed.

If you click on the star next to the name of the athlete, you can view the graphic representation of the athlete's target.

If you click on an individual score value it will highlight that shot on the target and you can collapse and close to target diagram and score with the icons on the right.

If you click on the Download icon in the pdf column you can download a nice report of your individual scores.

I hope you find this useful.

NOTES

The alignment of the shots on the targets is not correct. The system expects the strips to be shot in a horizontal orientation (as if you would shoot on runners) but we place the targets in a vertical orientation, from the top down. Just keep that in mind as a shot group that shows an up and down movement is actually a left to right movement.
